**Composite Cylinders for Automotive CNG**

Company is pleased to announce successful trial production and testing of Carbon Fiber based Composite Cylinders for CNG for automotive applications. This has been done for the first time in India. Company has developed 60 ltr & 30 ltr non-metallic Type-4 Composite Cylinders which are able to withstand burst pressure of over 550 bars exceeding the requirement of ISO 11439 & IS 15935: 2011. It shortly starts process of getting approval from independent 3<sup>rd</sup> party and PESO before putting them on field trials. These LiteSafe Composite Cylinders offer numerous technical and operational advantages over conventional steel cylinders for the same application.

- Explosion proof
- Less than 1/4<sup>th</sup> the weight
- Strong & Durable
- Corrosion & Rustproof
- Conforms to the highest international standards

Automotive Companies are keen to replace metal cylinders with Composite Cylinders to reduce weight and improve upon fuel efficiency. These Cylinders are likely to find their way both with OEM and aftermarket. It also has a huge export potential.

Company is planning to launch these Cylinders in 2<sup>nd</sup> half of FY 2018-'19 after obtaining necessary approvals and extensive trials.
