

For immediate Release

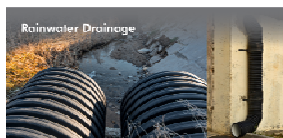

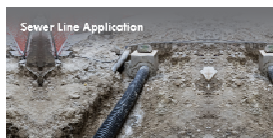

Mumbai : May 17, 2017

Time Technoplast Ltd., is amongst leaders in manufacture of High Pressure PE Pipes for use in urban and rural water supply, lift irrigation projects, effluent and desalination plants, industrial and many other related applications for up to 1400 mm dia. The Company now launches full range of structured wall plastic piping system (PE/PP Double Wall Corrugated Pipes) up to 800 mm dia mainly for application in sewerage and drainage collection and disposal system, sewerage/effluent treatment plants in the industrial areas, ducting, etc. under its brand **Max'M**.

Bureau of Indian Standards launched standard specification IS : 16098 Part II paving the way for structured wall plastic piping systems to be used under various schemes sponsored by Central Government, State Governments, Municipal Corporations, and other projects aided by World Bank, ADB and other international agencies.

Consequently, Time Technoplast has set up three plants at three locations for Double Wall Corrugated Pipes at Silvassa, Pantnagar and Hyderabad having capacity of over 2 mio running meter for manufacture of such pipes. **Max'M** Double Wall Corrugated Pipes meet most stringent international and European standards. It has also received the approval from Bureau of Indian Standards under IS 16098 Part II this week.

There are several ongoing and upcoming projects in the states of Rajasthan, Karnataka, Uttar Pradesh, Madhya Pradesh, Telangana, etc. for which tenders are afloat and Company expects to secure major orders. It is expected that ongoing smart city projects would use Double Wall Corrugated Pipes in significant quantities. Company has already commenced supplies to some prestigious institutions / projects and has received excellent feedback.
