

For immediate Release

Mumbai: May 03, 2017

Company launched its highly technical and innovative MOX film (Multi layer Multi axis Oriented Cross Laminated Film) under the brand '**Techpaulin**' effective 1st of April 2017. The product has taken off and received very well in the market. Company has appointed over 27 distributors / dealers in the state of Kerala, Andhra Pradesh, Karnataka, Telangana and Maharashtra in the initial phase and the process of appointing distributors and dealers in other states is in progress.

This requires necessary approval and certification from Bureau of Indian Standards (BIS). We have received BIS Certification Mark License No. CM/L 7200089512 conforming to IS 14611:2016. We are the first one to have received such license / approval under the latest revision and STI (Scheme of Testing and Inspection) of the above standard IS 14611:2016 from BIS. It will facilitate wider use of Company's product specially with state governments, public sector undertakings and other govt./semi govt. agencies. Civil contractors for govt. projects are one of the biggest users of this product for variety of applications.

This is to keep valued investors informed of company's new venture.

Multi layer multi axis Oriented X cross laminated film (MOX)
