Q1 Revenue and EBITDA are up by 59% and 86% year-on-year led by higher utilization of capacities. The company is receiving overwhelming response for its Type-IV Composite cylinders for CNG Cascades and has also started receiving orders for the recently approved Type-IV Composite cylinders for On-Board application. In addition, after a long wait, Government owned Oil Marketing Companies (OMCs) have started to procure Type-IV LPG Composite cylinders and the company has received trial orders. With the Composite cylinder (LPG and CNG) operations of the company picking up along with stable core Industrial packaging business, we are very excited about the future prospects.
