# Who We Are

## LEADING THROUGH INNOVATION AND TECHNOLOGY

Leading Global Industrial packaging company

**First** to launch Type-IV Composite Cylinder for LPG and CNG (CNG cascade and on-board application) in India. **2nd Largest** Composite Cylinder manufacturer worldwide.

**Dominant market position** with over 55% market share in domestic Industrial packaging. **World's largest manufacturer** of large size plastic drums

**2nd largest** MOX film manufacturer in India

**Market leader** in 9 out of 11 countries it operates in

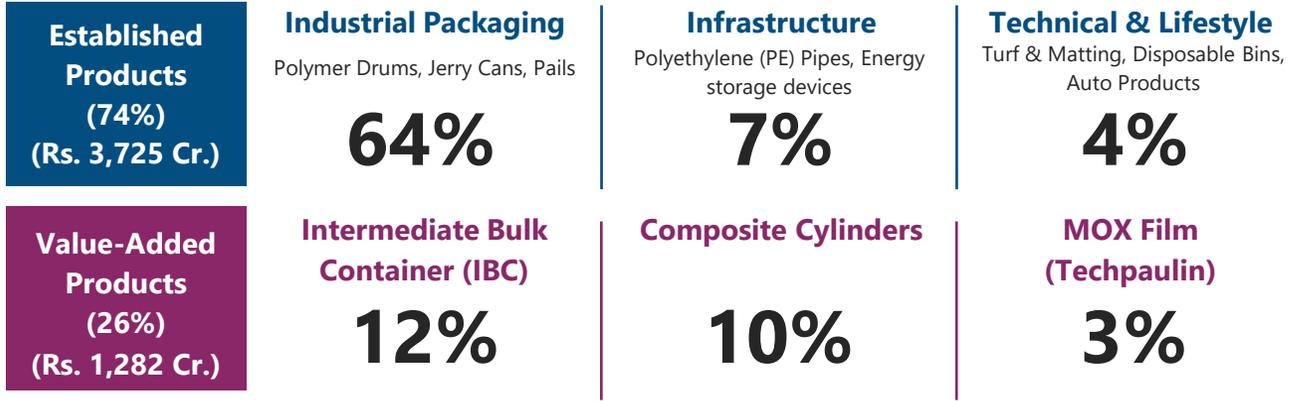

**Major Player** in manufacturing of HDPE pipes in India

**First** to launch Intermediate Bulk Container (IBC) in India and **3rd Largest** IBC manufacturer worldwide.

# Time Technoplast At A Glance

## Business Mix (FY24 total revenue : Rs. 5,007 Cr.)

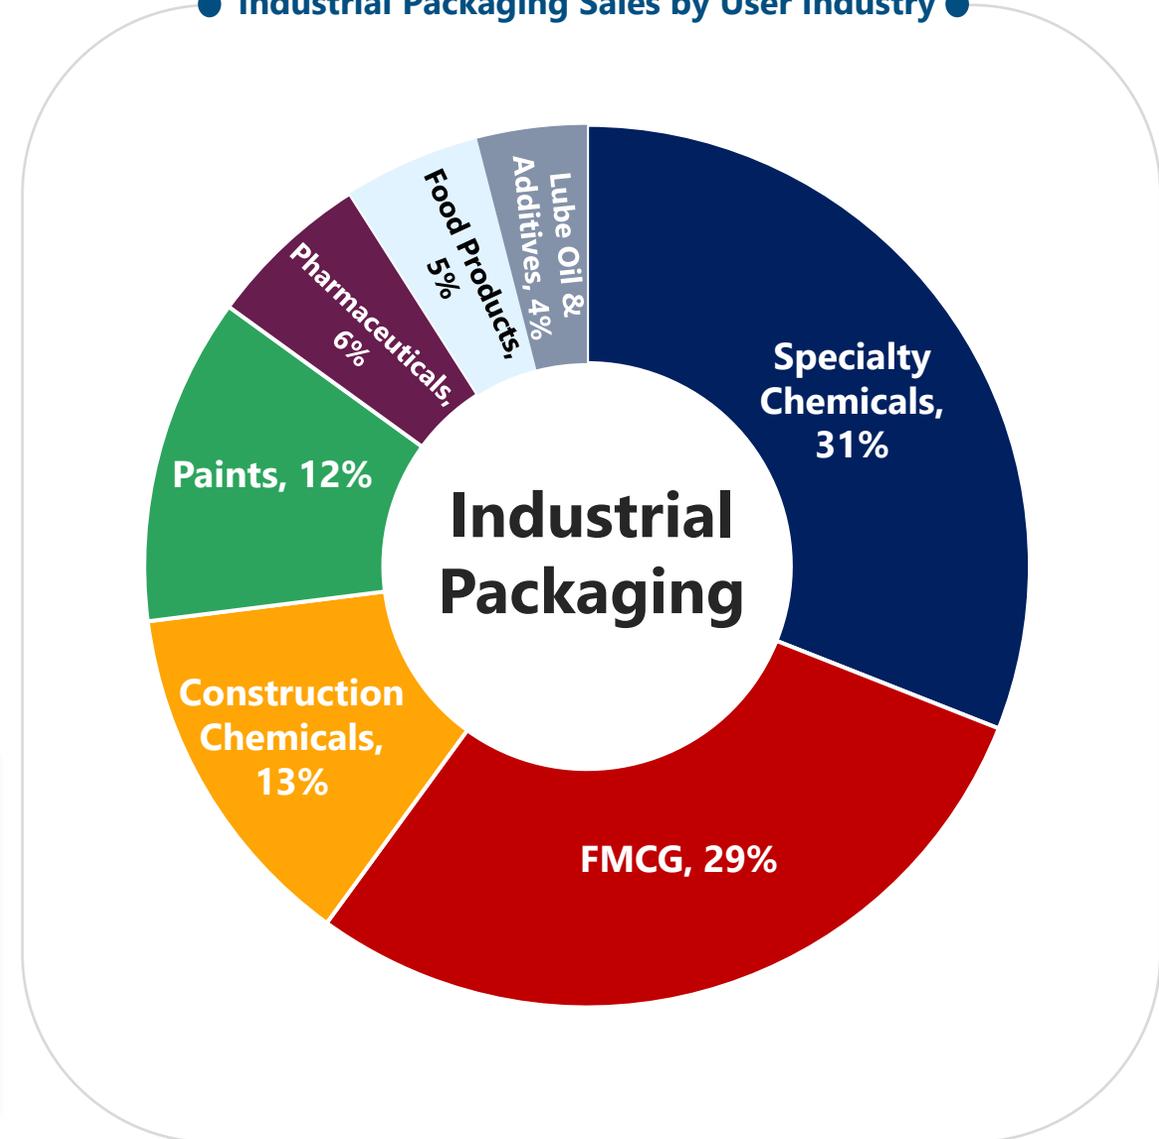

## Geographic Revenue Breakup (FY23)

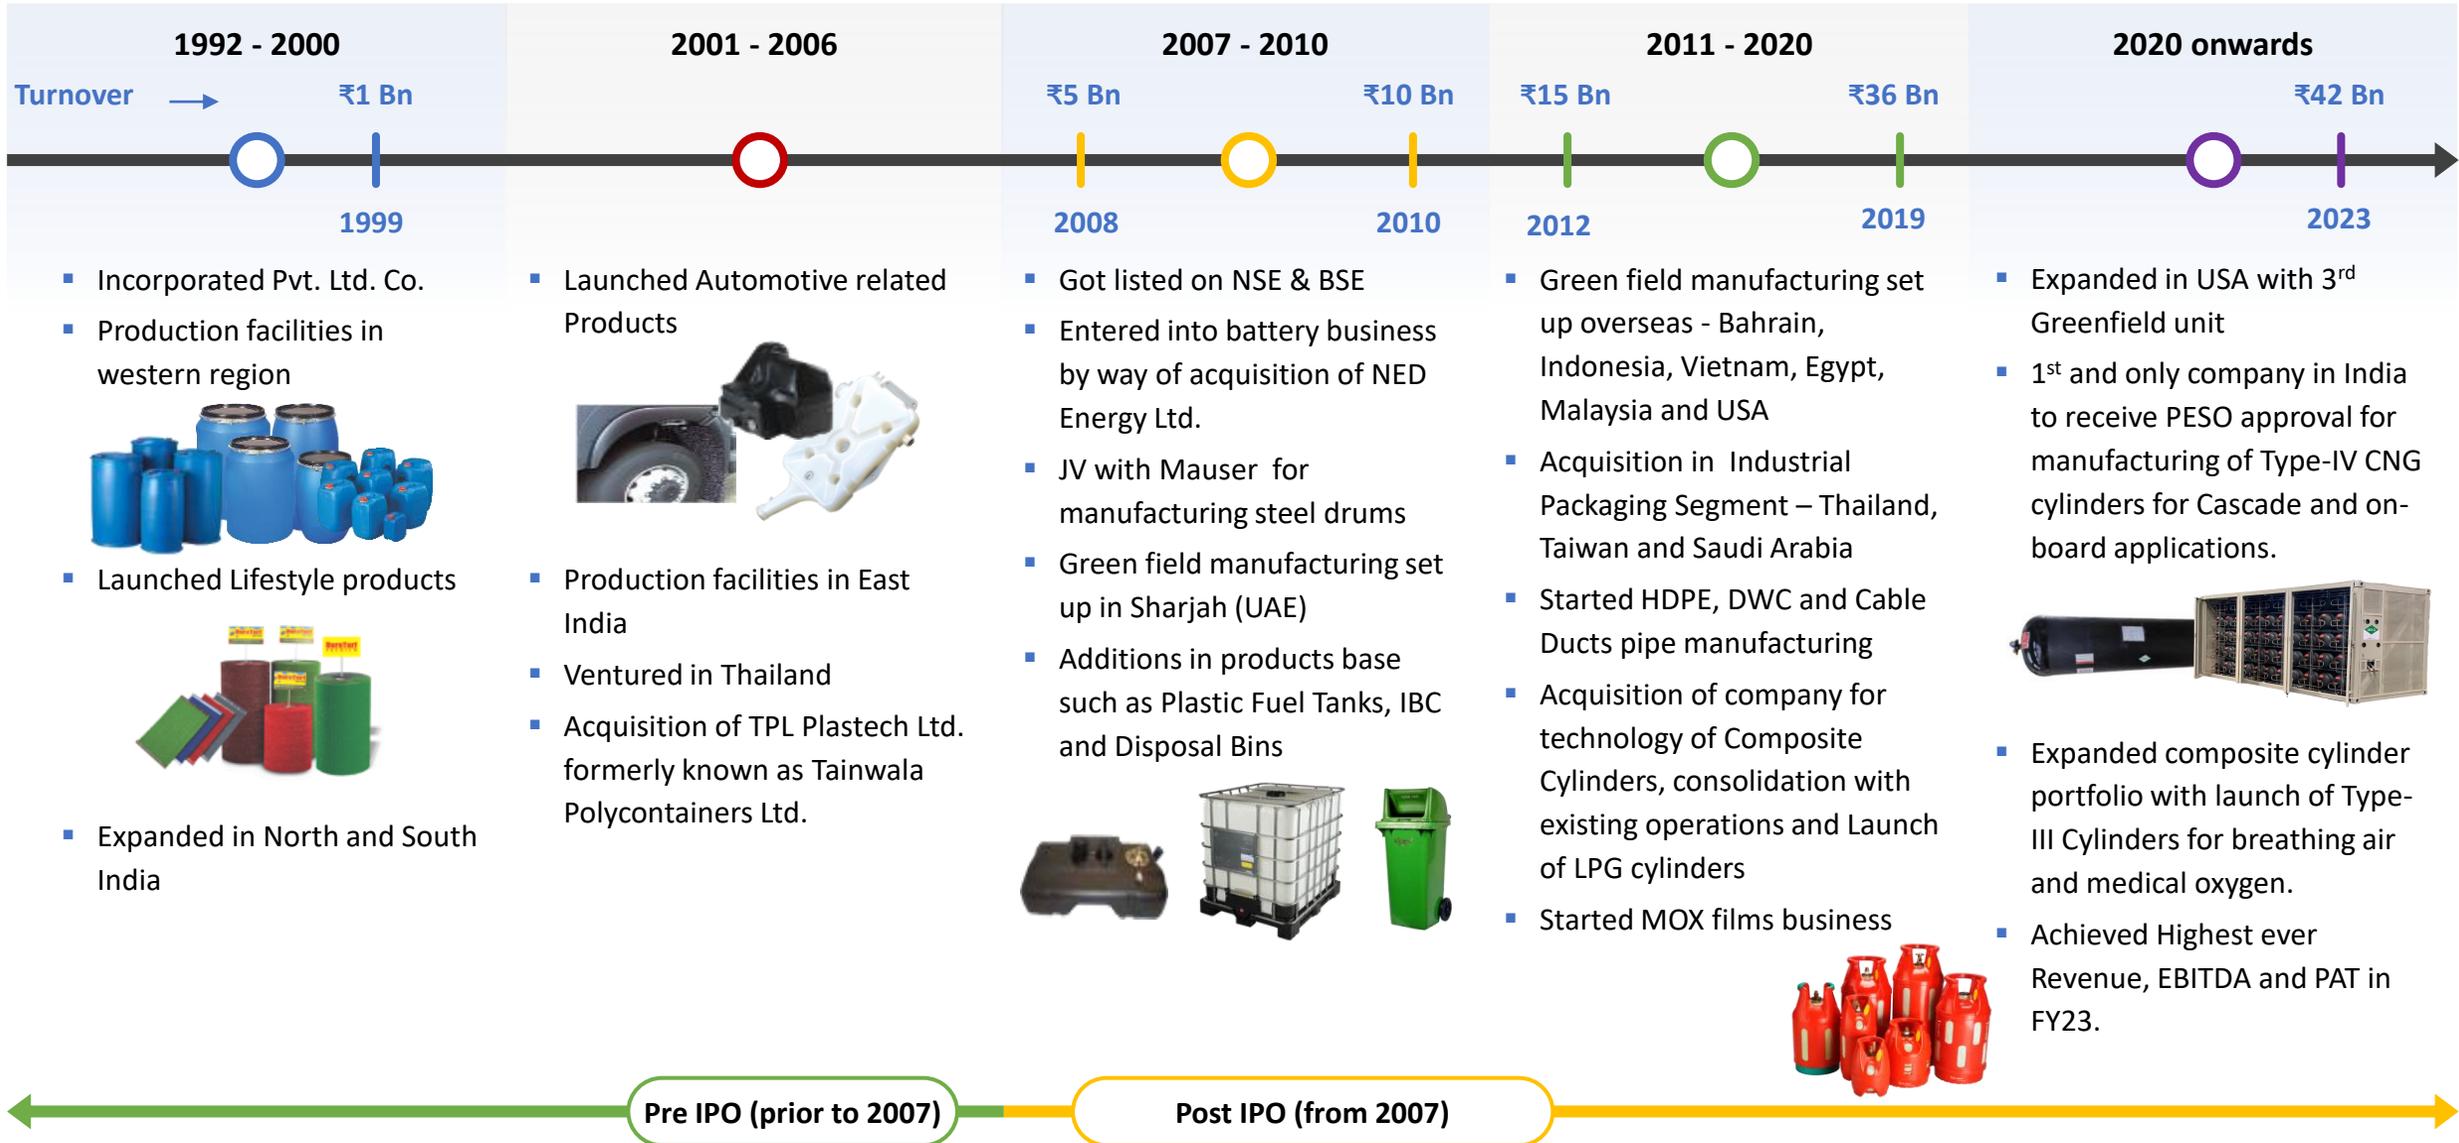

- Strong presence in Asia & MENA regions with presence in 10 different countries outside India
- 14+ recognized brands with over 900 institutional customers globally
- Well established in-house R&D team of around 30 people having experience of more than 15 years

**Focus on Innovative & Tech oriented polymer products and have several firsts to our credit:**

- **1st** to launch PE drums to replace steel
- **1st** to launch IBC
- **1st** to launch Composite Gas cylinders (LPG, CNG & Oxygen)
- **1st** Plastic Fuel tanks in CVs
- **1st** to launch Tubular Gel Batteries
- **1st** to launch Anti-Spray Rain Flaps
- **1st** to get PESO for Composite Hydrogen cylinder

**Technology based Innovative Polymer and Composite products**

**Relationship based business- Entrenched relationships with 900+ clients including several large global Fortune 500 companies with 92% sales B 2 OEM**

**Well established in-house R&D team of around 30 people having experience of more than 20 years**

# Established Products - Industrial Packaging

- Time Tech produces Polymer drums / barrels, Jerry cans and Pails for varied packaging requirements.
- The Company uses technologies of polymer processing such as blow moulding, injection moulding and extrusion to produce a wide range of products.
- These are made through a fully automated continuous process without any welds or joints. They are fitted with special stoppers, plugs, bungs, inserts, caps, handles to meet specific design & requirements.
- The Company caters to varied sectors like chemicals, paints and pigments, food and beverage, petroleum, industrial coatings, agricultural, pharmaceutical, mineral, packaging, automotive and building products.

<b>Range:</b>	5 Ltr to 250 Ltr capacity
<b>Brand:</b>	Techpack
<b>Manufacturing Locations:</b>	India (16) & Overseas (10)
<b>Industry:</b>	Chemicals, Petrochemicals, Paints, Etc.

## Key Highlights

- Over 900 institutional customers
- Largest manufacturer of Industrial Packaging in Asia and MENA Region
- Increasing strategic tie-ups with MNCs across different countries due to significant presence in the Asia and MENA Region
- Market Leader in 9 out of 11 countries in Industrial Packaging

# Industrial Packaging Industry – Market & Development

## Market

- The global market for industrial packaging is estimated to reach \$123.2 Bn by 2032, at a CAGR of over 5.9% owing to increasing trends in end-use industries such as automotive, food & beverages, chemical, construction and oil & lubricant.

## Drivers

- Shift from metal to polymer packaging due to technical and operational advantages and lower costs.
- A clear trend towards IBC is visible, which is correlated with a growing demand for reconditioning solutions mainly in developed regions.
- Given the presence of strong domestic demand for specialty chemicals, low cost of production and availability of skilled labour, large foreign players are increasingly looking at India as an alternative investment destination due to implementation of strict environmental norms in China.

## Emerging Packaging Scenario

- Multinational companies looking east for lower cost of production.
- Bringing in Good Manufacturing practices and improved handling systems.
- Improvement in transportation and handling facilities.
- Bulk transportation reducing logistic and shipping costs

# Established Products - Infrastructure

## High Density Polyethylene (HDPE) Pipes

- HDPE pipes are capable of handling semi-solid & gaseous effluents and has unmatched resistance to corrosive chemicals. They are lighter, easy to handle & install compared to heavier metallic or concrete pipes.
- These pipes are 100% leak proof therefore they are preferred over Galvanized, Ductile iron, Cement and conventional piping systems.

<b>Range:</b>	20 mm to 1400 mm in different pressure range.
<b>Brand:</b>	Max'm PE Pipes
<b>Manufacturing Locations:</b>	India (4)
<b>Industry:</b>	Water Supply , Irrigation, Sewage, Effluent Treatment, Desalination Plant, Power Plants, Cable ducting, Etc.

*Launched new generation multilayer pipes for power / communication cable ducts with silicon in-lining. The pipes / ducts have substantial business potential specially in development of Smart Cities*

## Energy Storage Devices

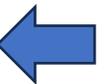

- TimeTech manufactures valve-regulated lead-acid (VRLA ) Batteries conforming to National and International Standards by adopting internationally proven Eco-Friendly processes.
- These batteries has a proprietary Grid alloy composition with high tin composition which improves the positive grid corrosion resistance and battery life.

<b>Range:</b>	Up to 3000 Ah
<b>Brand:</b>	MAX Life, MAX Pro, Sun Qualita & MAX Qualita
<b>Manufacturing Locations:</b>	India(2)
<b>Industry:</b>	Solar power, UPS, invertors, Telecom, Railway Etc.

# Established Products - Technical & Lifestyle

## Turf & Matting

**DuroTurf**  
PREMIUM

**DuroSoft**  
Matting  
Elegance with efficiency!

**DuroWipe**  
ALL-PURPOSE MATTING

- TimeTech is one of the leading players in the matting segment. TTL has been delivering value for money solutions across industries and customers.
- These Lifestyle Products are not only functional but also add to the aesthetics
- **Brands:**
  - Duro Turf/Soft: Mats used to scrape off dirt
  - Duro Wipe: Mats for wiping water
  - Duro Mat Regular
  - Duro Active: Mats for application in industrial outlets
  - Duro Comfort: For professionals demanding long standing hours
- **Manufacturing Locations:** India(2)
- **Industry:** Household, Hotels, Hospital, Multiplex, Etc.

## Disposal Bins

**DUMPO**<sup>®</sup>  
BINS

- Disposal Bins a necessity for hygienic life and made from recyclable material. These Bins adhere to stringent international quality standards. It's superior design ensures easy handling
- Offers high resistance to UV Radiation & Decay.
- **Range:** 120 & 240 Ltr capacity
- **Brand:** Dumpo Bins
- **Manufacturing Location:** India(1)
- **Industry:** Household, Commercial, Industrial, Municipal Corporation, Etc.

## Auto Components

**3S** RAINFLAPS

**TechDAT**

**TECH TANK**

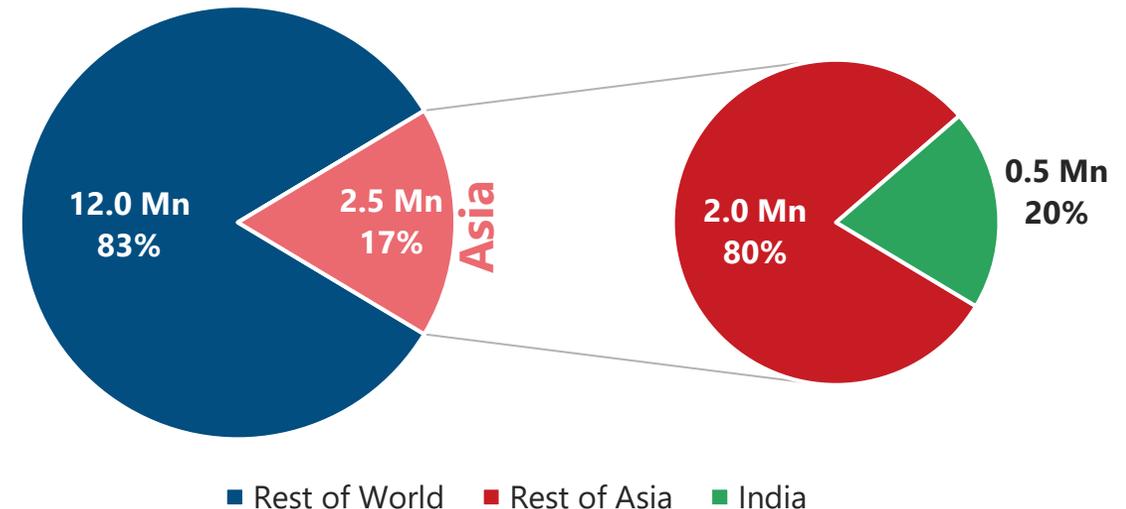

- Rain flaps consists of unique surface formed by multiple tufts / grass blades with a strong and sturdy backing.
- The company offers a range of high performance, dependable & long lasting De-aeration & Fuel Tanks., which are stronger, lighter in weight, corrosion resistant and more efficient to transfer the coolant.
- The Air Ducts manufactured by the Company meets the high performance requirement needed by the automobile industry.
- **Brand:** 3S RainFlaps, TechDAT & TechTANK
- **Manufacturing Locations:** India(3)
- **Industry:** Automotive

# Value Added Products – Intermediate Bulk Containers - IBC

- Range:**
  - 1,000 Ltr capacity
- Capacity:**
  - 6.3 Lakh units p.a. in India and
  - 14.4 Lakh units p.a. overseas
- Users:**
  - Petrochemicals, Foods, Solvents, etc.
- Features:**
  - Space Efficiency, Eliminate Waste, Durability and Eco-friendly.
- Opportunity:**
  - Rapid growth in chemical industries across Asia
  - Increasing automation
  - Multi-fold growth in trade from Asia to the western countries
- Position:**
  - 3<sup>rd</sup> Largest manufacturer Worldwide.

IBC's Market Size (Mn Units)

# Value Added Products – MOX Film

- 
- Range:**
- 35 to 320 GSM thickness
- 
- Capacity:**
- 12,000 MT p.a.
- 
- Users:**
- Agriculture, Infrastructure, Packaging, Commercial Vehicles and many more
- 
- Features:**
- Tear/Puncture Resistant, 100% Waterproof, Weathering Resistant, UV Resistant, and Chemical Resistant.
- 
- Opportunity:**
- The size of agricultural films market was USD 12.2 Bn in 2022 and is projected to grow at a CAGR of 6.9% to reach USD 18.5 Bn by 2028.
  - Asia Pacific is likely to see robust growth in these films and TIME would be leveraging its wide distribution network in domestic as well as overseas market
- 

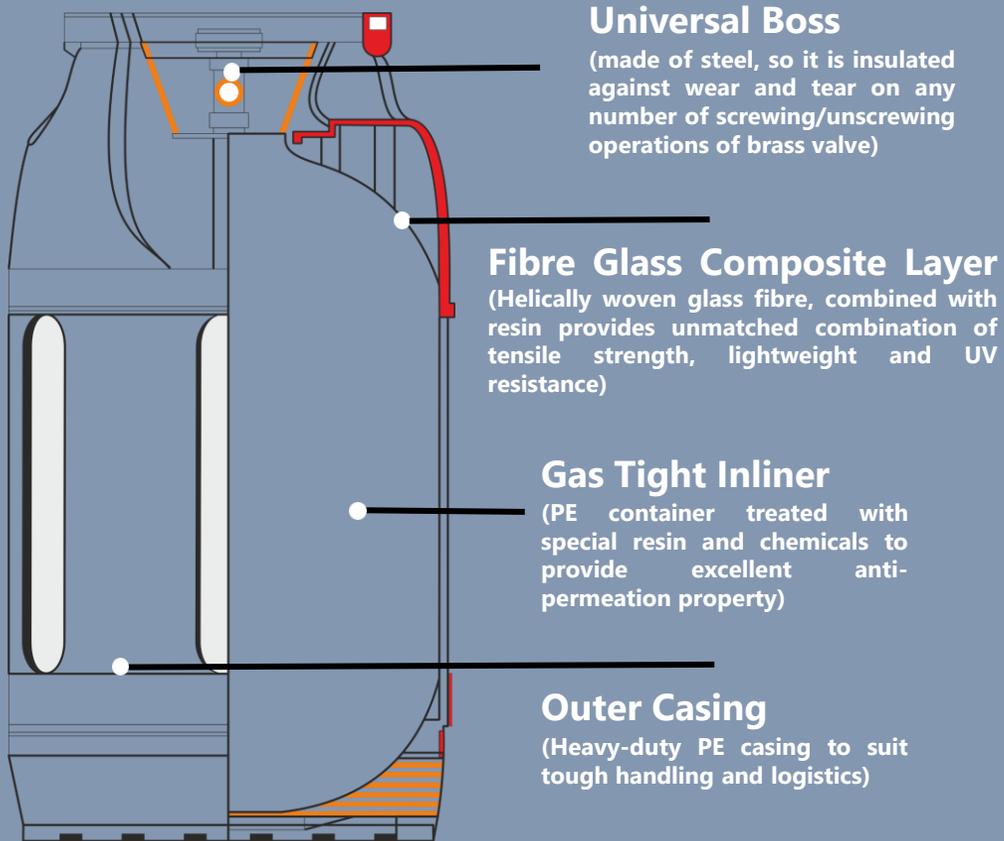

# Focus on Composites

## **We are at inflection point Shifting from Tech based products to High-Tech products with focus on Composites**

- Composite is a material of future replacing metals in high performance applications
- Tectonic shift
- Harnessing new growth opportunities in existing business
  - Launching new products with huge business potential
  - Aspire to be largest Composite product company in the country
  - New product launches will help improve margins and reduce working capital
  - We draw strength from the launch of LPG Composite Cylinders and maintaining market leadership in 10 years

# Value Added Products – Type-IV LPG Composite Cylinder

**UV Protected**

**Non-Corrosive**

**Translucent Body**

**Recyclable Material**

**Low Maintenance**

**Aesthetically Appealing**

**Explosion Proof**

**High-Tech**

**Light Weight**

- World's largest range of composite cylinders; 2<sup>nd</sup> largest manufacturer worldwide
- Approved in over 50 countries and supplied on over 45 countries
- There are over 2.5 bn metal cylinders in circulation worldwide implying significant addressable opportunity
- Supplies ongoing to Indian Oil Corporation Limited (largest oil marketing company in India) in domestic market; Discussions ongoing with BPCL and HPCL
- New countries added recently include Taiwan, Ghana, Nigeria, Bermuda, St. Lucia, Romania, Burundi, Australia, UAE and the USA

The New Generation LPG Cylinders  
Light weight Composite Cylinders for Safe Cooking

**Cook The Way The World Does**

While the world has changed around us, Steel cylinders have remained the same. Switch to the New Generation light weight LPG Composite Cylinders

- Light Weight**
  - LPG Composite Cylinders weigh 50% less than the weight of the Steel Cylinders
  - Easy to Carry, Store and health Change of Cylinders
  - No Rusting, No Floor Stains
- Smart Cylinder**
  - See and track the level of Gas in the Cylinder
  - Easy to refill and fit to the Cylinder
  - Absolutely Leakproof
  - Strong, Safe and Durable
- Attractive**
  - New age polymer and composite make the Cylinder light and attractive
  - No Colour peeling off
  - No Rusting
  - No Colour Fading
- High Safety**
  - Highly Safe
  - No Bursting Danger
  - Complies to Global Standards

LPG Composite Cylinders – a perfect partner for your modern kitchen. Shift to the New Generation LPG Composite Cylinders and experience the host of advantages.

**New Delhi:** City gas companies have grown their super-profitable CNG sales volume at a faster rate in the past two years than the less profitable segment of gas supplies meant for homes.

City gas distributors sold 19.4 million metric standard cubic meters a day (mmscmd) of CNG in six months to March 2023, up 51% from October 2020 to March 2021 period, oil ministry data showed. In the same period, the sale of piped natural gas (PNG) meant for cooking at home rose 11% to 2.9 mmscmd.

Sales to commercial customers that includes hotels and malls, dropped 25% to 0.7 mmscmd, while those to industries fell 38% to 10.3 mmscmd as high imported gas prices forced them to switch to alternative fuels.

As a result, the share of CNG in city gas distributors' overall sales sharply increased to 58% in two years from 39% in the six months to March 2021. The share of sales to industrial customers fell from 50% to 30%. The share of sales to households, or domestic PNG, rose marginally to 8.7% from 8%.

City gas companies get price-controlled domestic natural gas, which they can sell at market rates as CNG and domestic PNG. They are mostly

monopolies in their licensed areas, giving them pricing power and fat margins. CNG and domestic PNG prices are mainly influenced by the rates of alternative fuels such as petrol and LPG cylinders. Petrol is heavily taxed and mostly moves in line with international prices, while CNG and domestic PNG are very lightly taxed.

At March-end, the number of CNG stations in the country was 5,665, up 83% in two years. Domestic PNG customers expanded by 41% to 1.1 crore in the same period. Delhi is the largest market for CNG, while Gujarat is the largest market for domestic, commercial, and industrial customers of natural gas.

City gas distributors mostly import liquefied natural gas (LNG) to supply commercial and industrial customers. Extraordinarily high prices of natural gas in international markets in the past two years forced industrial and commercial customers to switch to alternative liquid fuels such as LPG and fuel oil.

India's LNG imports fell to 19.9 million metric tonnes (mmt) in the last fiscal year, down 22% from 25.6 mmt in 2019-20.

Expansion of CNG stations across the country, increased availability of CNG cars, and high petrol prices have combined to boost CNG sales in the country, an industry executive said.

## RIL to Spend ₹5,000 cr to Set up over 50 Biogas Plants in 2 Years

Co which plans to set up 106 CBG plants is said to have tendered out half of them

@timesgroup.com

**Mumbai:** Reliance Industries (RIL) is planning to set up more than 50 compressed biogas (CBG) plants in the next two years at a cost of over ₹5,000 crore, according to two oil and gas industry executives aware of the development.

At RIL's annual general meeting last August, chairman Mukesh Ambani had announced plans to set up 100 CBG plants in five years. CBG is a green fuel produced from waste or biomass sources. It has properties similar to compressed natural gas (CNG) and can be used for automotive, industrial and commercial uses.

"RIL has tendered out over 50 compressed biogas plants to be set up in the next two years. It will shortly be floating a tender for the remaining plants," said one of the executives. "The tenders have been given out for technology as well as engineering, procurement and construction."

The retail oil refining conglomerate has also revised the target on the number of CBG

### Scale & Impact

Each CBG plant to have a feedstock processing capacity of **250-500 tonnes/day**

Investment Estimate (10 TPD plant) **₹100 crore**

RIL's in-house team will source feedstock, and the company is in talks with sugar mills for supply

CBG Production Range: **10-20 TPD**

Environmental Impact

Agro-residue & waste consumption: **5.5MT**

Carbon emissions reduction: **2MT CO<sub>2</sub>**

Organic manure production: **2.5MT/year**

VIJAY P

plants to 106 from 100, this person added. RIL did not respond to an email sent on February 19 seeking comment.

Each plant, the people said, would have a feedstock processing capacity of 250-500 tonnes a day, with CBG production in the range of 10 tonnes to 20 tonnes per day. The estimated investment in a 10-tonne-per-day plant is around ₹100 crore.

RIL's in-house team would be sourcing the feedstock for the plants. The company has also been in discussions with multiple sugar mills for sourcing sugarcane press mud and feed-

stock for CBG production, the people said.

"India produces nearly 230 million tonnes of non-cattle feed biomass, most of it contributing to air pollution. Within a short span of one year, we have become India's largest bio-energy producer based on our indigenously developed technology," Ambani had said at the AGM. RIL has already set up two CBG demo units at its refinery facility in Jamnagar and has commissioned the first commercial-scale CBG plant at Barabanki in Uttar Pradesh.

Through its CBG units, RIL

aims to consume 5.5 million tonnes of agro-residue and organic waste, mitigating nearly two million tonnes of carbon emissions, and produce 2.5 million tonnes of organic manure annually. This would result in a reduction of about 0.7 million tonnes per annum of imported liquefied natural gas.

These CBG units will also help RIL scale up the retailing of CBG and bio-CNG (purified form of biogas) at the Jio-BP fuel retail outlets shortly. Jio-BP outlets are set up by Reliance BP Mobility a joint venture between RIL and British energy major BP Plc.

"We are adding a lot of (fuel) stations. CBG alone will see 200 (station) additions," Harish Mehta, CEO of Reliance BP Mobility, had told ET on the sidelines of the Indian Energy Week in Goa early this month. According to Mehta, the retail CBG will be 95% pure.

RIL last December tied up with DBS Bank India to launch a financing programme for CBG plants to facilitate the CBG industry which is highly fragmented, agriculture-dependent and affected by seasonal variations.

## TO ACCELERATE EXPANSION EFFORTS

### GPS Renewables Raises ₹411 cr from Top Lenders

Our Bureau

**Mumbai:** Bengaluru-based GPS Renewables on Tuesday said it has raised \$50 million (₹411.5 crore) in debt financing from a clutch of private and public sector banks, and non-banking financial companies including Punjab National Bank, HDFC, Yes Bank and HSBC Bank.

The funds will be used for its nationwide execution of compressed biogas (CBG) plants, said a company statement.

GPS Renewables provides end-to-end solutions for the development, production and distribution of biofuels.

It has set up more than 100 biogas plants and has an order book of \$240 million (₹2,000 crore) and memorandums of understanding worth \$540 million (₹4,500 crore) for the execution of CBG plants across the country.

vos-Triodos Fund and Hyderabad-based Caspian Impact Investments.

"To further accelerate our efforts, we not only need financial backing but also strategic industry collaborations. The current round of funding will allow us to accelerate our expansion efforts and promote India's transition to sustainable green energy," said Tilak Minocha, chief finance controller, GPS Renewables.

In August 2023, GPS Renewables had acquired Germany-based Proweps Envirotech GmbH, a design and engineering company specialising in technologies for utilising municipal and industrial organic waste and agri-residue for biogas production.

Looking ahead, through its climate infrastructure platform, GPSR Arya, the company plans to develop own CBG projects via a joint venture with Indian Oil Corporation.

The company reported a turnover of about \$60 million (₹500 crore) for 2023-24, "registering a 225% growth over 2022-23". During this period, the company increased its full-time employee strength to 500-plus from 72, it said, adding that it continues to stay net profitable despite a steep turnover growth of more than 2,500% since 2020-21.

**Funds will be used for nationwide execution of compressed biogas plants, says co**

# Type-IV CNG Composite Cylinders – Mobile Refueling Units (MRUs)

## India's First Mobile Refueling CNG Unit with Type-IV Composite Cylinders

Virtual inauguration on June 8, 2021 by Mr. Dharmendra Pradhan-  
Union Minister for Petroleum and Natural Gas

- MRUs act as Mobile CNG Stations
- Can be parked anywhere for filling
- Fills up to 300-400 vehicles per day

# Market Potential : Mobile Refueling Units (MRUs)

Total existing and committed new CNG stations in India by 2024	7,300
Conversion to MRUs (~30%)	2,200
Estimated cost of one cascade (Rs. per cascade)	60,00,000
<b>Total Value of Business in next 4 years (Rs. Cr.)</b>	<b>1,320</b>

## Key Benefits of Mobile Refueling Units

It is an efficient solution for market seeding since it is cheaper and faster to deploy

Reduction in Service cost (O&M expense) of CNG stations

It is an effective solution for Transporters, Taxi aggregators, School vans etc.

Help in congestion management at existing CNG stations

Help in increasing geographical reach to areas with Ltd. pipeline connectivity (hilly terrains etc.)

Total number of cascades	10,000
Estimated cost of one cascade (Rs. per cascade)	60,00,000
<b>Total Value of Business in next 3 years (Rs. Cr.)</b>	<b>6,000</b>

❖ Under the SATAT scheme, total 5,000 CBG plants have been envisaged by 2023, which will produce around 15 MMT of CBG per annum.

## Potential in the Country

- It has been estimated that there are six major sources from which CBG can be synthesized in India – Recoverable Cattle Dung, Bagasse, Agri residue, Sewage Treatment Plant, Municipal Solid Waste and Spent Wash/Press Mud.

• The total CBG potential in India has

## Benefit to the Country

- As per international carbon accounting standards, CBG has 'zero' associated Carbon emissions.
- Reduction in emissions due to crop burning.
- Reduction in landfill emissions due to municipal and sewage waste.

# Market Potential : Gas Generators for Telecom Towers

Towers- 20% of existing Telecom Towers use gas generators(~ 1.8 lakhs towers)	32,000
MRUs required (1 MRU for every 4 towers)	8,000
Estimated cost of one cascade (Rs. per cascade)	60,00,000
<b>Total Value of Business in next 4 years (Rs. Cr.)</b>	<b>4,800</b>

**Opportunity in India**

- Addressable market for conversion to gas generators is estimated to be ~1.8 lakh towers.
- The market is expected to grow at a CAGR of 3 percent over the next 4-5 years.
- Assuming 20 percent of existing and upcoming telecom towers use gas generator as back-up fuel, the total realizable potential is estimated to be around 32,070 towers.

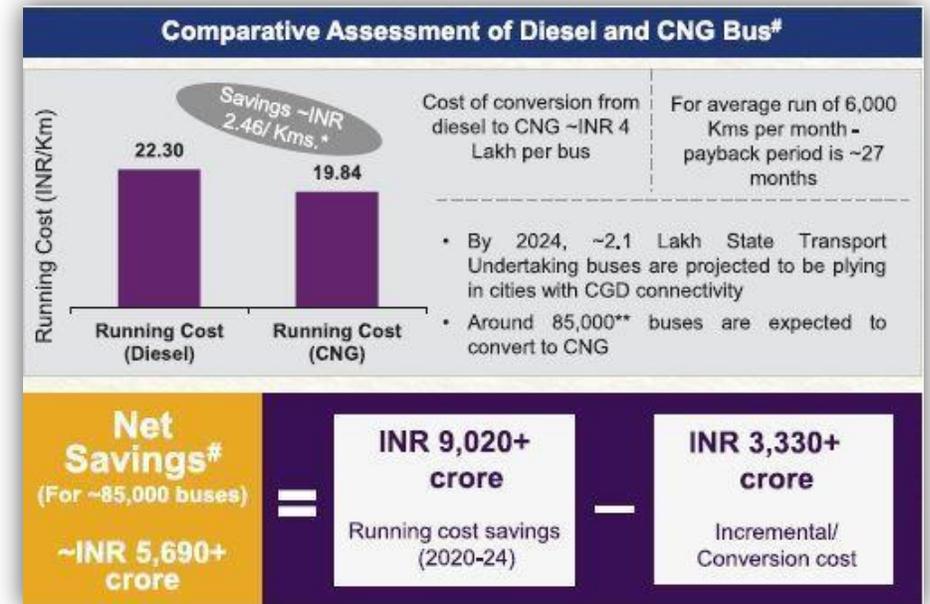

**Cost Benefit Analysis**

- The cost of retrofitting a 25KVA DG set is ~INR 3 lakhs, while the cost of a new 25KVA Gas based generator set is ~INR 5 lakhs\*.
- The cost of retrofitting a 125KVA DG set is ~INR 6 lakhs, while the cost of a new 125KVA Gas based generator set is ~INR 13 lakhs\*.
- For an average outage of 4 hours per day, annual consumption of 5,760 litre of diesel may be replaced by Natural Gas.
- Total annual diesel savings for 32,070 towers is estimated to be 184.7 million litre (0.18 percent of India's diesel consumption).

## Composite Air Tank for Heavy Vehicles

- The air compressor draws filtered air from the atmosphere and compresses it, storing the compressed air in high-pressure reservoirs.
- Currently these reservoirs are made-up of steel which are very heavy & prone to corrosion due to presence of moisture in the air.
- Time Technoplast Limited, first time in the world has developed these Type-4 Composite tanks which are 54 % lighter than steel tanks, has long life, no corrosion & can sustain large pressures.

### Specification

- Capacity : 30L
- Material : Liner-HDPE  
Composite-Glass fibre + Epoxy resin
- Weight : 5.6 kg
- Weight of metal air tank : 12 kg
- Weight saving- 54%
- Customer name- TATA MOTORS
- Vehicle name-Tata Ultra 9/9m EV & Tata Ultra 9/12m EV

- **Core Business- Industrial Packaging**

- Huge growth opportunities for global industrial packaging market

Projected to grow from USD 69.5 Bn in 2022 to USD 123.2 Bn by 2032 (5.9% CAGR)

- Chemicals, Pharmaceuticals , Food & Beverages etc. expected to grow significantly.
- Shift of chemical manufacturing base from China to **India and other Asian countries**, significant growth opportunity.
- Intermediate Bulk Containers (IBC's) gaining popularity due to cost effectiveness, easier handling and emphasis on sustainability.
- Faster replacement from metal to polymer and composite products due to substantial increase in steel prices.

- Huge potential market of around Rs. 2,200 Cr. per year for CNG cascades and CNG onboard applications aided by government thrust (Lower import bill and commitment for climate change).
- Government focused spend on Infra projects and development of smart cities (HDPE pipe business to contribute going forward).

# Way Forward

**Chemical production shifting from China to other Asian countries**

**IBCs growing faster**

Time is the largest and major player in most countries it operates in

**Recycling efforts to encourage sustainability**

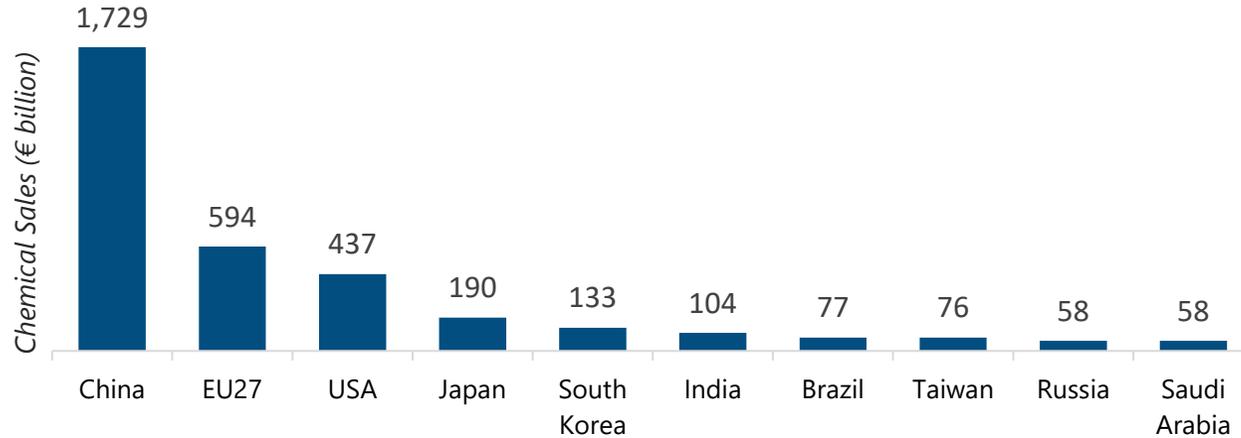

**Polymer and Composite products to gain share from metals**
